

Dear Student,

The world of visual effects relies on the wizardry of VFX Compositors & Video Editors. From Spiderman jumping across buildings to Baahubali fighting an entire army, everything is the magic of post-production, of which Compositing and Editing are the two most important aspects. VFX Compositors are responsible for photo-realistic output by seamlessly integrating live action footage & computer graphics 2D and / or 3D, special effects. Video Editing requires visual aesthetic, a sense of pacing to draw out the emotion of the story, and an attention to detail. The artistic skills required for the role of VFX Compositor and Video Editor is the understanding of the elements of composition, lighting and shadow and colour. Therefore, Arena Animation has introduced the VFX Compositing & Editing Program.

The Media and Entertainment industry is expected to reach ₹3.07 trillion in 2024.* The Indian Animation & VFX industry is estimated to reach ₹ 151.80 billion in 2023.* The Media & Entertainment industry is also expected to provide 65 lakh jobs by 2022.*
